

Technical Bulletin  
Changing the Delphi from Celcius to Farenheit

**Note:** The Delphi ships as celsius by default but users can switch to Farenheit by accessing the temperature menu on the device.

**Step 1:** Touch and hold your finger on the touchscreen until the password screen comes up (~5 seconds) press anywhere except the “clear” icon on the top right corner.

**Step 2:** Tap the password box and a virtual keyboard come out, enter the default password of admin (no caps) and hit OK.

**Step 3:** On the main menu tap “**Temperature Settings**” and then click the button next to °F and hit save. Exit out of the main menu and your Delphi Delphi will now display temperatures in Fahrenheit.
